Economic Modelling

Index to Volume 9

January, April, July, October 1992

Articles – titles

Accuracy *versus* efficiency when modelling investment. *B. Smith*. 9.2, 98–103

Dynamic optimization without dynamic programming. *G. C. Chow*. 9.1, 3–9

Effects of taxation in economic models: a survey. *Anthonie Knoester and André Kolodziejak*. 9.4, 352–364

The financial behaviour of French households. *Jerôme Henry, Ivan Odonnat and Roland Ricart*. 9.3, 270–289

The financing of corporate firms in France: an econometric model. *Olivier de Bandt and Pascal Jacquinot*. 9.3, 253–269

Foreign position in French francs: an econometric study with stock data over the EMS period. *Camille Baulant and Michel Boutillier*. 9.3, 290–300

The gap between the market practitioner and the theoretical and applied economist: invited lecture. *H. Motamen-Scobie*. 9.4, 306–312

Gaussian estimation of a second order continuous time macroeconometric model of the UK. *A. R. Bergstrom, K. B. Nowman and C. R. Wymer*. 9.4, 313–351

Input–output models, directed graphs and flows in networks. *J. Asger Olsen*. 9.4, 365–384

The measurement of interindustry linkages: key sectors in the Netherlands. *Erik Dietzenbacher*. 9.4, 419–437

Mending the family tree: a reconciliation of the linearization and levels schools of AGE modelling. *Thomas W. Hertel, J. Mark Horridge and K. R. Pearson*. 9.4, 385–407

A model of the French financial system at the Bank of France: MEFISTO Version 1 (Modelling the Evolution of FInancial STOcks). *The MEFISTO team (J. Cordier, M. Boutillier, C. Baulant, O. de Bandt, S. Derangère, J. Henry, P. Jacquinot, I. Odonnat, F. Renard and R. Ricart)*. 9.3, 211–252

MONA: a quarterly model of the Danish economy. *Anders Møller Christensen and Dan Knudsen*. 9.1, 10–74

MORKMON II: the Nederlandsche Bank's quarterly model of the Netherlands economy. *M. M. G. Fase, P. Kramer and W. C. Boeschoten*. 9.2, 146–204

Negative coefficients and eigenvalues of economic models. *L. Schoonbeek*. 9.2, 111–120

On the methodology of constructing large econometric models of an East European economy (Poland). *W. Welfe with J. Gajda and E. Zółtowska*. 9.2, 137–145

Profit sharing and employment. *J. C. Eckalbar*. 9.2, 104–110

Qualitative data and error measurement in input–output analysis. *Peter Nijkamp, Jan Oosterhaven, Hans Ouwersloot and Piet Rietveld*. 9.4, 408–418

Structural estimation and stochastic simulation of large non-linear models. *K.-H. Toedter*. 9.2, 121–128

Technical change, input substitution and the specification of dynamic factor demands. *B. A. Larson*. 9.2, 129–136

Towards a macrometric policy model of a semi-industrial economy: the case of Egypt. *S. El-Sheikh*. 9.1, 75–95
